SUMMARY I am a Computer Science student at BINUS University, with a strong dedication to developing expertise in information technology, particularly in software development, UI/UX design, and front-end development. I am accustomed to working with a solution-oriented approach, capable of understanding user needs and delivering effective technical implementations. With adaptability in dynamic work environments, I can perform both independently and collaboratively within a team to achieve optimal results.

WORK EXPERIENCE **IT Development (Front End)** February 2025 – February 2026
PT. Abhimata Persada

- Developed front-end applications using React.js, implementing CRUD operations, integrating APIs for data management, and building responsive user interfaces to support internal business processes.
- Developed and enhanced **CRM and Accounting applications**, supporting internal business processes and improving data management workflows.
- Designed and developed UI/UX **interfaces for Bank Mega Syariah**, focusing on responsive, intuitive, and user-friendly web interfaces.
- **Managed and queried PostgreSQL databases** using DBeaver, including data retrieval, manipulation, and troubleshooting to support application functionality.
- Collaborated with the development team to troubleshoot, debug, and improve front-end functionality based on business and user requirements.
- Participated in meetings to gather requirements, understand business workflows, and align application features with user needs.

EDUCATION **BINUS University | Computer Science** 2022 – 2026

Relevant Coursework: Agile Software Development, Database Technology, Software Engineering, Artificial Intelligence, Pattern Software Design, Mobile Programming (Android)

TECHNICAL SKILLS

- Office Tools: Microsoft Office (Word, Excel, PowerPoint), Canva
- Programming Languages: SQL, HTML, CSS, JavaScript, PHP
- Frameworks & Libraries: Laravel, Springboot, React, ReactNative
- Version Control & DevOps: GitHub, Docker
- Database: MySQL, PostgreSQL, MsSqlServer, Firebase
- Cloud Platforms: AWS, Google Cloud
- Virtualization: VMware
- Operating Systems: Linux (Ubuntu), Windows
- API Development & Testing: RESTful APIs, Postman

SKILLS Strong leadership and team management skills, effective communication and public speaking, event planning and logistics expertise, mentoring and coaching ability, and proficiency in administrative and documentation tasks.

PROJECT

Kirana – Aplikasi untuk Kesehatan Mental

Role: Front-End Developer

Developed the entire website/application architecture using HTML, CSS, JavaScript and documented the development process in a structured format.

MallPath – Web Platform untuk Mall Navigation

Role: Front-End Developer

Designed and implemented responsive UI/UX for a platform using HTML, CSS, JavaScript, and Figma for wireframes.

EventFest – Web Platform untuk Manajemen Event

GitHub: <https://github.com/acrtelis/EventFest---404Spirit>

Role: Full-Stack Developer (Laravel) | Team: 3 Members

Teknologi: Laravel 11, Blade Template, MySQL, Railway (Deployment)

Developed a centralized web-based platform for publishing and managing event information. Took full responsibility for backend development and frontend integration.

Key Features & Contributions:

- **Registration Link Management:** Implemented event detail features that redirect participants to external registration forms (third-party) based on organizer configuration, ensuring flexible data collection.
- **User Roles & Authentication:** Built a secure authentication system with role verification (Admin, Organizer, Sponsor, User) and account settings for profile management and role upgrades.
- **Admin, Organizer, and Sponsor Dashboards:** Developed interactive dashboards for event/sponsor data management (CRUD), event status monitoring, and user management.
- **MVC Architecture with Service Pattern & Database Optimization:** Applied Model-View-Controller architecture to separate business logic and UI, implemented service-repository pattern, and optimized queries using Eloquent ORM.
- **Deployment & UI/UX:** Deployed the application on Railway and ensured responsive design across devices using Blade Template and Bootstrap.

Achievements:

- Delivered a functional MVP prototype within 20 days.

Chronos Plan – Mobile App untuk Manajemen Tugas

Role: UI/UX Designer

Designed the UI/UX using Figma, including user flows, wireframes, and interactive prototypes to create an intuitive and user-friendly experience. Documented the application's features, functionality, and user flows to support the development and maintenance process.
